

SOCIAL MEDIA SAFETY

Social media may connect us to other like-minded people and the world; but it may also expose us to risks if we're not careful! Learn how to protect yourself (and your digital identity) with smart and secure choices. Stay private and stay safe!

PROTECT YOUR PRIVACY

Do not share personal details such as your full name, address, school, or phone number on the internet! Use strong passwords, two-factor authentication and keep your profiles on private when possible.

THINK BEFORE YOU SHARE!

The internet is forever! EVERY post, photo and comment that you make will live online forever. Ask yourself: What if my parents, friends, family, or future employers see this? Would I be okay with that? If not, then NO! Do not post it.

KEEP AN EYE OUT FOR RED FLAGS

Be wary of messages from random strangers on the internet, don't click on suspicious links, and do not fall for offers that seem too good to be true! If someone makes you uncomfortable, don't hesitate to press the BLOCK & REPORT button! Safety comes first.
